August 10, 2011

To: Washington State Redistricting Committee

The following suggestions for Redistricting of the 41st Legislative District were derived by six citizens who met Saturday, August 6, 2011, and who spent several hours with maps of different districts.

Conclusion: We suggest no changes which would effect the 8th Congressional District configuration.

We do suggest an adjustment to the East boundary of the 41st Legislative District which shifts seven (7) precincts into the 5th Legislative District. The precincts we consider better suited to the 5th District than to the 41st District are:

1. 41-2977 population 650
2. 41-2401 population 934
3. 41-3533 population 632
4. 41-3145 population 1632
5. Cougar Mountain population 124
6. Squack Mountain population 151
7. High Valley population 1039

Total population 5162

Please see our ORANGE boundaries of the above noted precincts on the attached map, which we suggest as the revised boundary between the 41st and the 5th Legislative Districts.

The maps we have do not align, but using the precinct designations above will provide you an accurate accounting of our suggestion.

Thank you for this opportunity.

Regards,

Jackie Dunbar
