Question:

Recommendation: Please consider moving Mill Creek out of the 44th LD and into the same LD as the City of Bothell. Mill Creek has much more in common with Bothell than the other cities in the current 44th. These two communities share an interest due to geography, demographics, transportation, and density type (both are very suburban). By doing so, not only will Mill Creek fit in a more appropriate district with Bothell, but the other cities in the 44th will have an increased commonality, as Lake Stevens, Snohomish, southeast Marysville, and Machias all share common interests in the same approach such as demographics, geography, transportation (State Route 9 is the backbone), and density (these are "fringe suburban" and semi-rural communities). As such, please also consider moving the communities of Clearview, Cathcart, and Maltby into the 44th, as these communities fit more appropriate with Snohomish, Lake Stevens, etc, than with Bothell. Thank you for your consideration.
