

7/27/11

Phone Call: Kamren Mukhtar - 28422 46 Ave S. Auburn, WA 98001 - Congressional District 9

I would like to comment on creating a minority district and how I am against it. I myself am from India. Creating a minority district would be a disservice. Skin color is irrelevant to debate. I personally would like to see a swing district. You debate about ideas not skin color warfare. Best ideas get best representation. I think it should be 50/50 or independent. If you create a district that is a Democratic or Republican it will be to the extreme. A Democrat, I hate to say it, but all they want is Social funds; food stamps, TANIF. A white person could easily represent minority. Minorities are doing themselves a disservice by saying they could better represent. Mix district not by race but ideas. We need a congressman who will listen to both sides, not a person who will only listen to one side. This is America. It's about ideas not about you and your little world. I wouldn't mind anyone African or White representing me. I just hate the give me this, give me that. What about work hard? It's ok to have government help but the constant crying and whining is annoying. We are not all like that. Minorities complain about no colored people on the commission. if you want it, get educated and fight for it. I came to America for better opportunity to make myself better. I hope the commission doesn't cave into a minority district.
